Part B	Native Hawaiian Education	FY 2009: \$33.315 million
Part C	Alaska Native Education	FY 2009: \$33.315 million

Champions Academy™ new online tutoring platform is an interactive web-based offering that addresses the unique math needs of children in grades four through eight. The program is designed with convenience and flexibility for schools in mind, with the ability to determine the length of program based upon their individual student needs, and to host 60-minute sessions directly on-site in a school computer lab, or remotely on personal computers from home.

One tutor is provided for every four students. Learning plans are designed to meet individual student needs identified during their individual pre-tests. These pre-tests are taken upon enrollment in order to accurately pinpoint skill gaps and areas of strength.

Champions'® qualified educators lead tutoring sessions via an interactive web portal providing individual attention and support to each student including English language learners or those with special needs. Verbal interaction is encouraged through headsets over a voice-over IP (VOIP) configuration, in addition to a variety of on-screen tools available including a chat feature, a whiteboard drawing tool, a "raise hand" option and motivational stamps for instructors to provide positive feedback as they monitor students' work.

Student progress is measured throughout the program and with the completion of a post-test at the program's conclusion, which identifies skills developed and areas for continued growth.

For further information on how these funds can be used in conjunction with Champions Academy™, please call 800-350-5034 or visit www.discoverchampions.com
